

Contents

Introduction	2	Superfamily Ellipsocephaloidea Matthew, 1887	31
Geological setting and stratigraphy	3	Family Ellipsocephalidae Matthew, 1887	33
Lithostratigraphy	3	Subfamily Antatlasinae Hupé, 1953	34
Stratigraphic discontinuities and sequence stratigraphic signatures	5	Genus <i>Berabichia</i> Geyer, 1990	34
Age and correlation	6	<i>Berabichia baltica</i> (Wiman, 1903)	35
Scania	7	Subfamily Strenuaevinae n. subfam.	37
Mjøsa area	8	Genus <i>Strenuaeva</i> Richter & Richter, 1940	38
Swedish Caledonides	8	<i>Strenuaeva primaeva</i> (Brøgger, 1878)	40
Central Sweden	9	<i>Strenuaeva inflata</i> Ahlberg & Bergström, 1978	41
Öland and Gotland	10	Genus <i>Epichalnipsus</i> Geyer, Popp, Weidner & Förster, 2004	42
Stage subdivision of the traditional 'Lower Cambrian' in		<i>Epichalnipsus anartanus</i> Geyer, Popp, Weidner & Förster, 2004	43
Baltica	10	<i>Epichalnipsus bergstroemi</i> n. sp.	45
Ljubomlian	10	<i>Epichalnipsus rotundatus</i> (Kiær, 1917)	49
Vergalian–Rausvian	11	<i>Epichalnipsus kullingi</i> (Ahlberg & Bergström, 1978)	53
Kybartaian	11	Subfamily Ellipsocephalinae Matthew, 1887	54
Intercontinental correlation	13	Genus <i>Kingaspidoidea</i> Hupé, emend. Geyer, 1990b	55
Scanian localities	15	<i>Kingaspidoidea nordenskiöldi</i> (Linnarsson, 1883)	58
Brantevik	16	<i>Kingaspidoidea lunatus</i> (Bergström & Ahlberg, 1981)	62
Gislövshammar	17	<i>Kingaspidoidea? obscurus</i> (Thorslund & Westergård, 1938)	66
Kvasa	18	Genus <i>Cambrosaurura</i> Geyer n. gen.	67
Forsemölla	19	<i>Cambrosaurura usitata</i> (Geyer, 1990)	68
Hardeberga	20	<i>Cambrosaurura robusta</i> Geyer n. sp.	73
Almbacken	21	<i>Cambrosaurura bommeli</i> Geyer n. sp.	77
Ontogenetical and ecological aspects	21	<i>Cambrosaurura? todraensis</i> (Geyer, 1990)	79
Ontogeny and autecology	21	Genus <i>Ellipsostrenua</i> Kautsky, 1945	82
<i>Epichalnipsus</i>	23	<i>Ellipsostrenua gripi</i> (Kautsky, 1945)	83
<i>Ellipsostrenua</i>	23	<i>Ellipsostrenua linnarssoni</i> (Kiær, 1917)	87
<i>Dellingia</i>	24	<i>Ellipsostrenua sularpensis</i> (Ahlberg & Bergström, 1978)	92
Synecology	24	<i>Ellipsostrenua brevifrons</i> n. sp.	96
Trilobite preservation and taphonomy	26	<i>Ellipsostrenua simrica</i> n. sp.	100
Ellipsocephalid morphology and its phylogenetic implications	28	<i>Ellipsostrenua</i> sp. A	103
Shape of glabella	28	<i>Ellipsostrenua troedssoni</i> n. sp.	104
Pattern of lateral glabellar furrows	28	<i>Ellipsostrenua granulosa</i> (Ahlberg, 1984c)	107
Morphology of palpebral lobes	29	<i>Ellipsostrenua spinosa</i> (Ahlberg & Bergström, 1978)	109
Transverse relief of cranidium	29	Genus <i>Dellingia</i> n. gen.	112
Sagittal convexity of preglabellar area	30	<i>Dellingia scanica</i> (Ahlberg & Bergström, 1978)	113
Shape of genal spine	30	<i>Dellingia</i> cf. <i>D. scanica</i> (Ahlberg & Bergström, 1978)	117
Morphology of pygidium	30	Subfamily Protoleninae Richter & Richter, 1948	119
Phylogenetic implications	31	Genus <i>Cuneoaxiella</i> n. gen.	119
Systematic palaeontology	31	<i>Cuneoaxiella grandis</i> (Ahlberg & Bergström, 1978)	120
Materials and methods	31	Acknowledgements	123
Repository	31	References	123
Class Trilobita Walch, 1771	31	Appendix	130
Order Redlichiida Richter, 1932	31
